X International Agriculture Symposium "AGROSYM 2019"

About International Agriculture Symposium „AGROSYM“

AGROSYM is, since ten years, an annual platform for international scientific discussion on agriculture, food, rural development, environment and forestry. AGROSYM represents a good opportunity to exchange ideas, to strengthen existing and to create new academic networks, and to foster dialogue between the academia, public institutions, the private sector and civil society organizations on the recent global and regional trends in the agro-food sector. Multidisciplinary results reported during AGROSYM will contribute to the dissemination of knowledge and good practices to all actors of the agro-food chain (e.g. farmers, extension agents, researchers, policy makers) as well as the general public about the importance of agriculture and food science, one of the most important strategic areas of many national research strategies.

The 9th edition of the International Agriculture Symposium "AGROSYM 2018" made an important contribution to the agriculture practice in different areas. During the four-day Symposium (4-7 October, 2018), over 1300 contributions were presented to more than 1200 participants representing 85 world countries (list of participants` countries available [here](#)).

AGROSYM 2019 will deal with the following thematic areas:

- 1 Plant production**
- 2 Plant protection and food safety**
- 3 Organic agriculture**
